DETAILED ACTION

1. All the four Terminal Disclaimers filed 2/27/2008 against co-pending applications 09/858,251 filed on 5/5/2001, 09/903.075 filed on 7/10/2001, 09/902,928 filed on 7/10/2001, and 09/955,264 filed on 9/10/2001 are approved.

Drawings

2. Figures 2, 3, 4, 9, 10 filed on 8/14/2006 and figure 12 filed on 3/8/2007 are approved.

New corrected drawings for figures 1, 5-8 and 11 in compliance with 37 CFR 1.121(d) are required in this application because in all these figures one of the following DRAWING deficiencies have been noted:

the character of the lines, numbers and letters is poor in all the Figures;
the illustrations are penetrated or traversed by a solid or broken line that is not intended to be part of the drawing, such as a dark line caused by a flaw in the copying process;

the drawings are obscure and marred by black smudges, obliterations, or fax/copier marks; and

numbers, letters, or reference characters in the drawings are illegibly handwritten.

Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid

abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

3. **Claims 1-7, 9- 15, 17-23 allowed.** Claims 1, 9 and 17 are independent claims.

4 The following is an examiner's statement of reasons for allowance:

The prior art of record, alone or combined, neither anticipates nor renders obvious a computer implemented method for determining a preference policy for an auction to be conducted, comprising, inter alia, the steps, as a whole, selecting characteristics of said auction to be conducted, selecting a relevant bidding model for said auction to be conducted, estimating a structure of said auction to be conducted, said estimating comprises expressing unobservable variables in terms of observable bids, wherein said unobservable variables are expressed in terms of observable bids by inverting said bid mode, predicting a bidding behavior for said auction to be conducted, predicting a first outcome of said auction to be conducted, and evaluating said first outcome of said auction to be conducted, wherein said evaluating comprises: selecting an optimal preference policy from a plurality of candidate preference policies for treating different groups of bidders differently, wherein said optimal preference policy comprises the candidate preference policy within a plurality having the highest ranking; and outputting said optimal preference policy to a participating entity in an auction, said outputting performed prior to conducting said auction.

5 Best prior art discussion:

(i) Zhang (US Publication 2003/0014346) teaches providing new computerized design tools for introducing new auction designs/methods/systems based on selected rules/parameters, enabling extraction of indirectly observable information of bidders related to his preferences and further enabling prediction of revenues and auction outcomes (see at least abstract and paragraphs 0008-0012). Zhang does not disclose evaluating outcome of the auction to be conducted, wherein said evaluating comprises selecting an optimal preference policy from a plurality of candidate preference policies for treating different groups of bidders differently, wherein said optimal preference policy comprises the candidate preference policy within a plurality having the highest ranking; and outputting said optimal preference policy to a participating entity in an auction said outputting performed prior to conducting said auction.

(ii) Ansubel (US Patent 6,021,398), Rackson et al. (US Patent 6,415,270), Luke et al. (US Patent 6,131,087) disclose different computerized auction techniques but the applicant's arguments (see Remarks, filed 3/8/2007, pages 18-22) are persuasive and compelling that neither one of these patents anticipates or, alone or combined, renders obvious the applicant's invention, specially the steps, as a whole, comprising evaluating outcome of the auction to be conducted, wherein said evaluating comprises selecting an optimal preference policy from a plurality of candidate preference policies for treating different groups of bidders differently, wherein said optimal preference policy comprises the candidate preference policy within a plurality

having the highest ranking; and outputting said optimal preference policy to a participating entity in an auction said outputting performed prior to conducting said auction.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
